

Open Government Partnership New Zealand

National Action Plan 2018-2020

Progress report: June – 30 September 2020

Commitment 8: Review of government use of algorithms

Lead agency:

Government Chief Data Steward, Stats NZ
Working with Government Chief Digital Officer, Department of Internal Affairs

Objective:

To increase the transparency and accountability of how government uses algorithms.

Ambition:

- To ensure New Zealanders are informed and have confidence in how the government uses algorithms – automatic decision-making processes used by computer programmes – to identify patterns in data.

OGP values:

Transparency, Accountability

Milestones		Progress
1	Complete an initial review of existing operational algorithms and their use across a range of government agencies <i>Start/End dates: 1 June 2018 to 31 October 2018</i>	
2	Consider next steps for all-of-government assurance related to the use of algorithms in collaboration with Civil Society representatives <i>Start/End dates: 31 October 2018 to 28 February 2019</i>	
3	Update this commitment (and its milestones) to reflect progress made in previous milestones <i>Start/End dates: 1 March 2019 to 31 March 2019</i>	

Progress key:

some delays

underway

completed

WHAT WE HAVE BEEN DOING

- We have begun work to ensure that data ethics are embedded at all levels of the government analytics workforce, through improvements in training and professional development for data analysts and decision makers.
- We have consulted with New Zealanders and civil society on a draft Algorithm Charter that enables government agencies to make a specific public commitment to the transparent and accountable use of algorithms and other

advanced data analytics techniques. Information was made available via a media release from the Minister of Statistics and shared on www.data.govt.nz.

- A summary of public submissions on a draft Algorithm Charter was published on www.data.govt.nz.
- In July 2020 we released the [Algorithm Charter for Aotearoa New Zealand](#), which is a commitment to ensuring New Zealanders have confidence in how government agencies use algorithms. Currently, there are 26 signatories across New Zealand government who have committed to applying the values of the Charter in their work. We anticipate being able to update this commitment (and its milestones) to reflect progress made.

HOW WE ARE INCLUDING DIVERSE VOICES

- Refer above

HOW WE ARE KEEPING DIVERSE COMMUNITIES INFORMED

- Refer above

WHAT'S NEXT?

- We are working with government agencies on implementing the Algorithm Charter for Aotearoa New Zealand and sharing learnings with international networks on an ongoing basis.
